Launch Tip of the Month March 2020

Microsoft's new browser, Chromium Edge (not to be confused with Google Chrome), provides a tool for removing annoying advertisements from articles on the web. It's called Immersive Reader View. It simplifies the layout of the page and even provides a tool that reads the page to you.

On the left, we have an article from Boston.com that is displaying multiple ads. On the right, we have the same article with no ads and a pleasant sepia background.

The all-new 2020 Chevrolet Corvette debuts a mid-engine design

It's the fist-ever mid-engine Corvette.

The all-new 2020 Chevrolet Corvette. -Chevrolet

The 2020 Chevrolet Corvette Stingray makes its debut as the first production mid-engine Corvette ever. This makes it look unlike any other Corvette with its engine just behind the seats rather than beneath the hood up front. Despite that major design change, it stays true to the Corvette aesthetic, just with supercar styling and a more powerful engine.

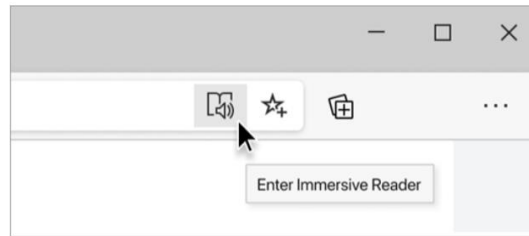

Power comes from a new 6.2-liter naturally aspirated V8 engine with 495 horsepower and 470 pound-feet of torque. This new LT2 engine shows off 35 more horsepower and five more pound-feet of torque than the LT1 it replaces. Chevrolet decided not to hide its new engine and instead placed it beneath a rear glass hatch so passersby can get a good look at what makes this Corvette so special.

In the past, the Corvette had a manual transmission, but that option is no more. The only transmission option now is an 8-speed, dual-clutch automatic and it's a first for Chevrolet. Although purists may balk at the lack of a manual, today's dual-clutch transmissions are fast and efficient, so they generally do a better job than most drivers do shifting the old-fashioned way.

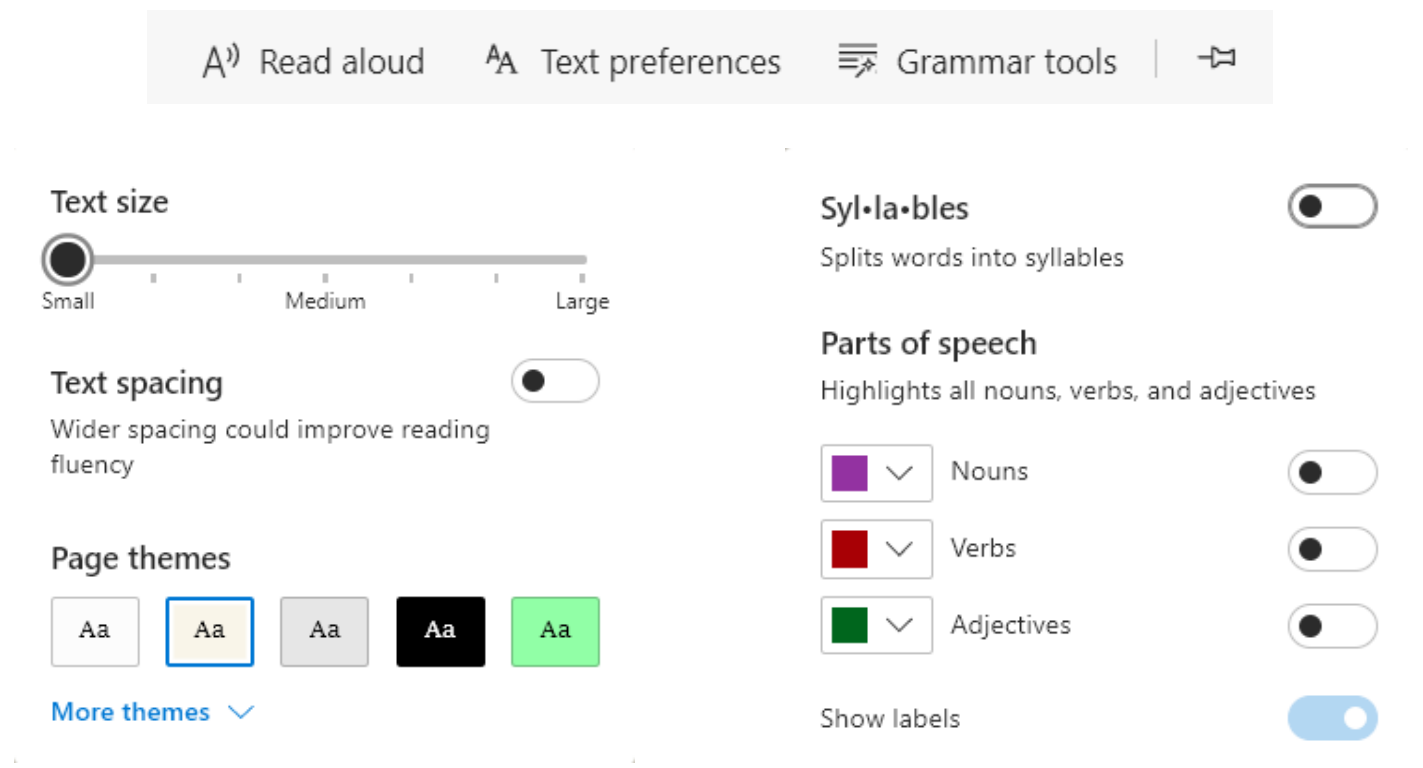

The Corvette's new design helps make this sports car handle better than ever. Moving the engine to the middle of the car allows for a more even weight distribution and helps lower the center of gravity. The design also allowed engineers to build the structure of the Corvette around a center tunnel structure.

To display the page in Immersive Reader View, click the icon that looks like a book with a speaker on the right side of the Address Bar.

Note: If no such icon exists, the page cannot be displayed in Immersive Reader View.

At the top of the screen, a toolbar is displayed with a set of tools that change the way the text is displayed. You can even change the color of words based on the part of speech!

Want to learn more about Edge? Launch offers a three-hour instructor-led class at your site or a 90 minute instructor-led webinar to expose you to more advanced features.

Featured Course: Microsoft Edge: Surfing and Searching the Internet

- Selecting a New Default Search Provider
- Working with Favorites
- Using Multiple Tabs
- Security
- Searching the Web
- Moving between Webpages
